¹Chemicals that reported national aggregate production volumes of 1 million lbs or more in at least 4 of 6 report years during U.S. EPA Chemical Data Reporting (CDR) cycles in 2016 and 2020 (CDR report years: 2014, 2015, 2016, 2017, 2018, and 2019). HPV status reflects analysis performed with U.S. EPA's Chemical Data Reporting data through 2020 submission year. Chemicals on this list are on the 2022 CHC list but no longer meet the high production volume definition¹ above.
