

Healthcare Business Continuity and Recovery

Health Care COOP

Continuity of Operations Planning (COOP) is focused on healthcare system recovery planning as outlined in the Hospital Preparedness Program (HPP) Cooperative Agreement by the Assistant Secretary of Preparedness and Response in Capability 2 - Healthcare System Recovery:

Healthcare system recovery involves the collaboration with emergency management and other community partners (e.g. public health, medical and education) to develop efficient processes and advocate for the rebuilding of public health, medical and mental/behavioral health systems to at least a level of functioning comparable to pre-incident levels and improved levels where possible. The focus is an effective and efficient return to normalcy or a new standard of normalcy for the provision of healthcare delivery to the community.

The information and tools located on this site are intended to support the ability of Minnesota's eight regional Health Coalitions to achieve the program requirements as outlined in Capability 2 – Healthcare System Recovery above and the corresponding Program Measures.
