

Community Health Board Social Vulnerability Index Scores

FOR THE FOUNDATIONAL PUBLIC HEALTH RESPONSIBILITIES FUNDING

The social vulnerability index (SVI) is a tool to identify socially vulnerable communities. SCHSAC obtained SVI scores from the CDC’s Agency for Toxic Substances and Disease Registry (ATSDR): [CDC/ATSDR Social Vulnerability Index \(SVI\) | Place and Health | ATSDR](#). The most current data is from 2020. The CDC assigns each county an SVI of 0 to 1, with 0 being the lowest vulnerability and 1 being the highest. Community health boards receive a score based on their quartile ranking. Multi-county community health boards receive the score based on their highest SVI county.
