

## Quality Framework Steering Team Meeting Agenda

*Time/Date:* 8:30 – 10:30, Monday, March 12, 2018

*Location:* Community Room, HIWAY Credit Union (840 Westminster Street, St. Paul)

I. **Welcome and Introductions** (15 minutes)

*Jennifer Lundblad and Diane Rydrych, Steering Team Co-Chairs*

*Marie Dotseth, Policy Advisor to the Commissioner of Health*

II. **Quality Improvement and Measurement: Exploring where we've been, where we are, and where we may go** (70 minutes)

a. Background and context

b. Steering Team role

c. Project scope

d. Discussion

III. **Stakeholder Engagement and Data Collection** (15 minutes)

a. Review and discuss tentative data collection plan

b. Review and discuss tentative stakeholder list

IV. **Next Steps** (10 minutes)

a. Details regarding our next meeting

b. Homework

c. Round the table check-in

V. **Public Comment** (10 minutes)

VI. **Adjourn**

## Quality Framework

Steering Team Meeting #1

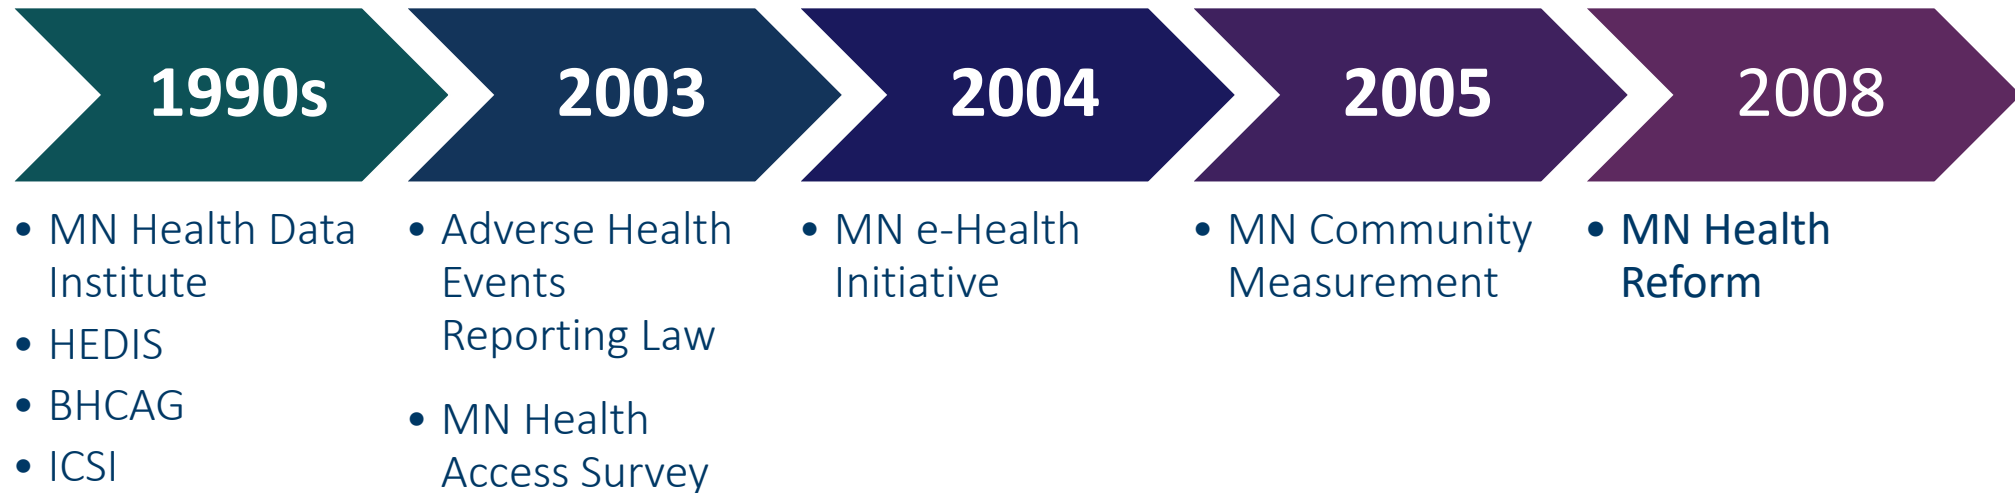

March 12, 2018

# Agenda

- Welcome and Introductions
- Background and Context
- Framework Discussion
- Data Collection Plan Preview
- Next Steps
- Public Comment

# Where we have been...

# What has changed over time...

## Accountable Care Organizations

MNSure

Medicare Beneficiary Quality Improvement Project

Accountable Communities for Health

## Health Equity

Electronic Health Record Systems

## Vital Signs Core Metrics

Integrated Delivery Systems

Behavioral Health Home

## Integrated Health Partnerships

## Health Care Homes

National Quality Strategy

Health Care Reform

Merit-based Incentive Payment System

HITECH Act

## Triple Aim

Value-Based Purchasing

## Meaningful Use

e-Prescribing

## Affordable Care Act

Patient-Centered Medical Homes

Health Information Exchange

# Where we are ...

- **Clinics and hospitals** report measures ... under state and national initiatives
- Results are **reported publicly**
- Health care purchasers use measures in **quality-based payment arrangements**
- Measures are used by commercial and public sectors, fostering **alignment** across local and federal initiatives

# What we don't know...

- Should quality measures be linked to **quality improvement goals, population health goals, health equity goals, cost reduction, disease burden**?
- Should all statewide measures be used in quality improvement, public reporting, and pay-for-performance, or are **different measures better suited to different functions**?
- How do we measure **other settings or across settings** along the care continuum?
- How can we **increase the efficiency** of quality measure reporting?
- How does **Minnesota continue to be a leader and innovate** in quality measurement?
- How do **align** with other measurement strategies without being **duplicative or redundant** or going backwards, and maintain a system that is relevant for Minnesota?
- What do we all need to know to be part of **health quality improvement** and the **delivery of high quality care**?

# Legislative charge

- Develop a measurement framework in collaboration with a broad group of stakeholders that:
  - Articulates statewide **quality improvement goals**;
  - Fosters **alignment** with other measurement efforts;
  - Identifies the most **important elements** for assessing the quality of care;
  - Ensures **clinical relevance**; and
  - Defines the **roles** of stakeholders

# Steering Team role

- Assist with the identification, articulation, and prioritization of **framework objectives**;
- Advise on the **key topics and questions** to use in outreach with a broader stakeholder audience;
- Think through the right perspective/people include in the **stakeholder consultation**;
- **Synthesize input from the broader stakeholder community** to contextualize and articulate themes and recommendations, and help build a roadmap, if necessary, towards a Minnesota quality framework; and
- Discuss ideas for **ongoing framework evaluation, maintenance, and updates**

# What would be a valuable outcome?

- Ongoing quality improvement **dashboard**?
- Metrics to monitor advancements in **health care equity**?
- Explicit linkages between quality measures and **population health goals**?
- Standing statewide quality/quality improvement **advisory body**?

# Assumptions

- Commitment to measurement
- Parsimony
- Different measures do different things
- Build on success

# Data collection planning

- Overview and purpose
- Research questions
- Methods
- Steering Team input
- Next steps

# Next steps

- Meeting #2: Late March/early April
  - Discuss framework principles (homework)
  - Firm-up project objectives, key questions, and data collection plan
- Doodle poll for meetings through September imminent
- Communications:
  - Measurement Framework webpage (<http://www.health.state.mn.us/healthreform/measurement/measfrmwk>)
  - Quality Framework Fact Sheet
  - [GovDelivery](#): Statewide Quality Reporting and Measurement System
  - Email [health.sqrms@state.mn.us](mailto:health.sqrms@state.mn.us)

# Homework

- What do you view as the **opportunities to advance health quality and improvement** in Minnesota?
- Are we filling a **gap or leaping to the next stage**?
- To what extent should our conversation be about the **system we want as patients**? How might the framework serve such a goal?
- Could existing draft “**principles of a statewide quality improvement roadmap**” lay the foundation for our quality improvement and measurement framework?
- How do we navigate the **tension between desires to align** with other local and national quality improvement and measurement initiatives **while avoiding duplication and replication and continuing to lead and innovate** in the field?
- What would happen if we in Minnesota **no longer required clinical measurement** (outside of HEDIS and federal requirements)?

# Public comment

# Adjourn
