

MDH Interoperability Webinar Series: NBS Blood Spot Electronic Orders/Results Use Case

Kristen Bye, Heather Brand, and Melinda Hanson

February 3, 2022

MDH Overall Data Strategy

Join any or all MDH Interoperability Webinars in this Series:

Date	Public Health Reporting Use Case
February 3	Laboratory Orders/Results – Newborn Screening Blood Spot (NBS)

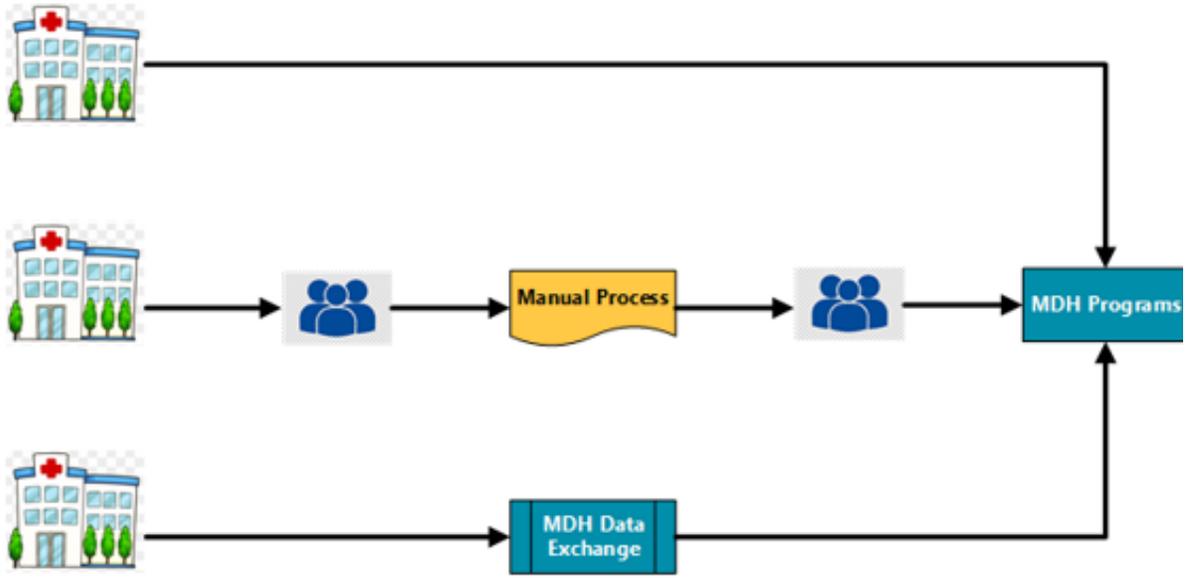

Webinar materials: [DSI website](https://www.health.state.mn.us/data/interoperability/webinar.html)
(<https://www.health.state.mn.us/data/interoperability/webinar.html>)

Webinar providing information towards:

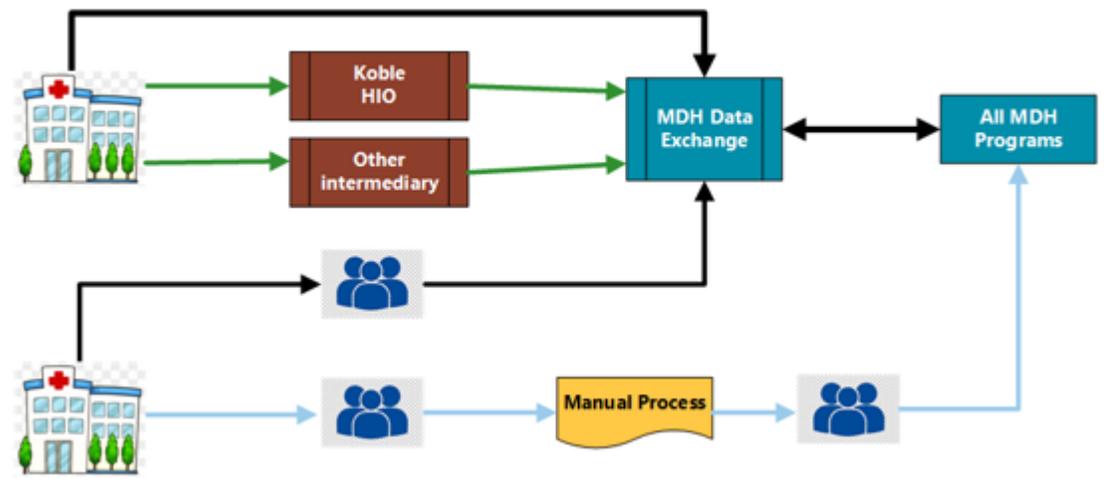

- ✓ Reducing your reporting administrative burden
- ✓ Meeting the CMS public health reporting requirements
- ✓ Improving data quality so information shared with MDH can better address future emerging threats and address population health issues
- ✓ Learning how you, your organization, and your patients benefit from improved public health reporting

MDH Interoperability Strategy: Overall

Current MDH Data Exchange

Planned MDH Data Exchange

MDH Request of External Partners

- ✓ **Schedule meeting with DSI** to discuss more details related to health system needs
 - Determine your organizations' public health reporting priorities for implementation and share with DSI (checklist)
 - Discuss any barriers or opportunities for electronic implementation with MDH
- [Consider Participation Agreement with Koble](https://3b54d489-fb07-4eda-b01d-8169cc695bc4.filesusr.com/ugd/64a972_dddba6a5436949e5952abe8094b9c778.pdf)
[\(\[https://3b54d489-fb07-4eda-b01d-8169cc695bc4.filesusr.com/ugd/64a972_dddba6a5436949e5952abe8094b9c778.pdf\]\(https://3b54d489-fb07-4eda-b01d-8169cc695bc4.filesusr.com/ugd/64a972_dddba6a5436949e5952abe8094b9c778.pdf\)\)](https://3b54d489-fb07-4eda-b01d-8169cc695bc4.filesusr.com/ugd/64a972_dddba6a5436949e5952abe8094b9c778.pdf)
- Plan and coordinate MDH public health reporting improvements through DSI and provide feedback to processes

Newborn Screening Program

What is Newborn Screening?

Newborn screening tests look for developmental, genetic, and metabolic disorders in newborn babies

If left untreated, these disorders can lead to illness, physical disability, developmental delay, or death

By identifying these disorders early, however, interventions, medications, or changes in diet can help prevent most health problems caused by the disorders on the newborn screening panel

Newborn Screening in Minnesota began in 1964

- Birth rate in MN is ~65,000
- MDH screens for more than 60 inherited and congenital disorders
- Three different screening methods
 - Blood spot screening
 - Critical congenital heart screening (CCHD)
 - Hearing screening

Blood Spot Screening

01

When a newborn is between 24 and 48 hours old, a health professional will take a few drops of blood from the newborn's heel

02

The drops of blood fill five spots on a filter paper card

03

After the drops of blood have dried, they are sent to the MDH laboratory to be screened

Blood Spot Screening Specimen Card

903™

Minnesota Department of Health, Newborn Screening Program, 601 Robert St. N., St. Paul, MN 55155-2531, Phone: (800) 664-7772 or (651) 201-5466, Fax: (651) 215-6285

COMPLETELY FILL EACH CIRCLE.
BLOOD SHOULD BE APPLIED ONLY TO ONE SIDE OF THE FILTER PAPER.

Current process is labor intensive with several manual steps

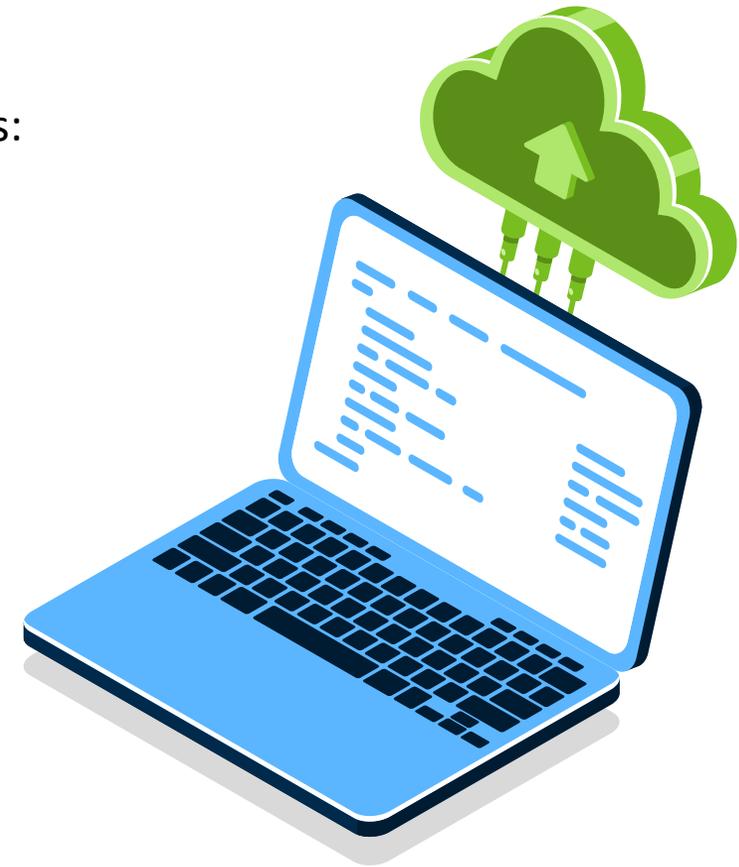

Our goal is to automate data entry for hospital staff with electronic laboratory orders and results

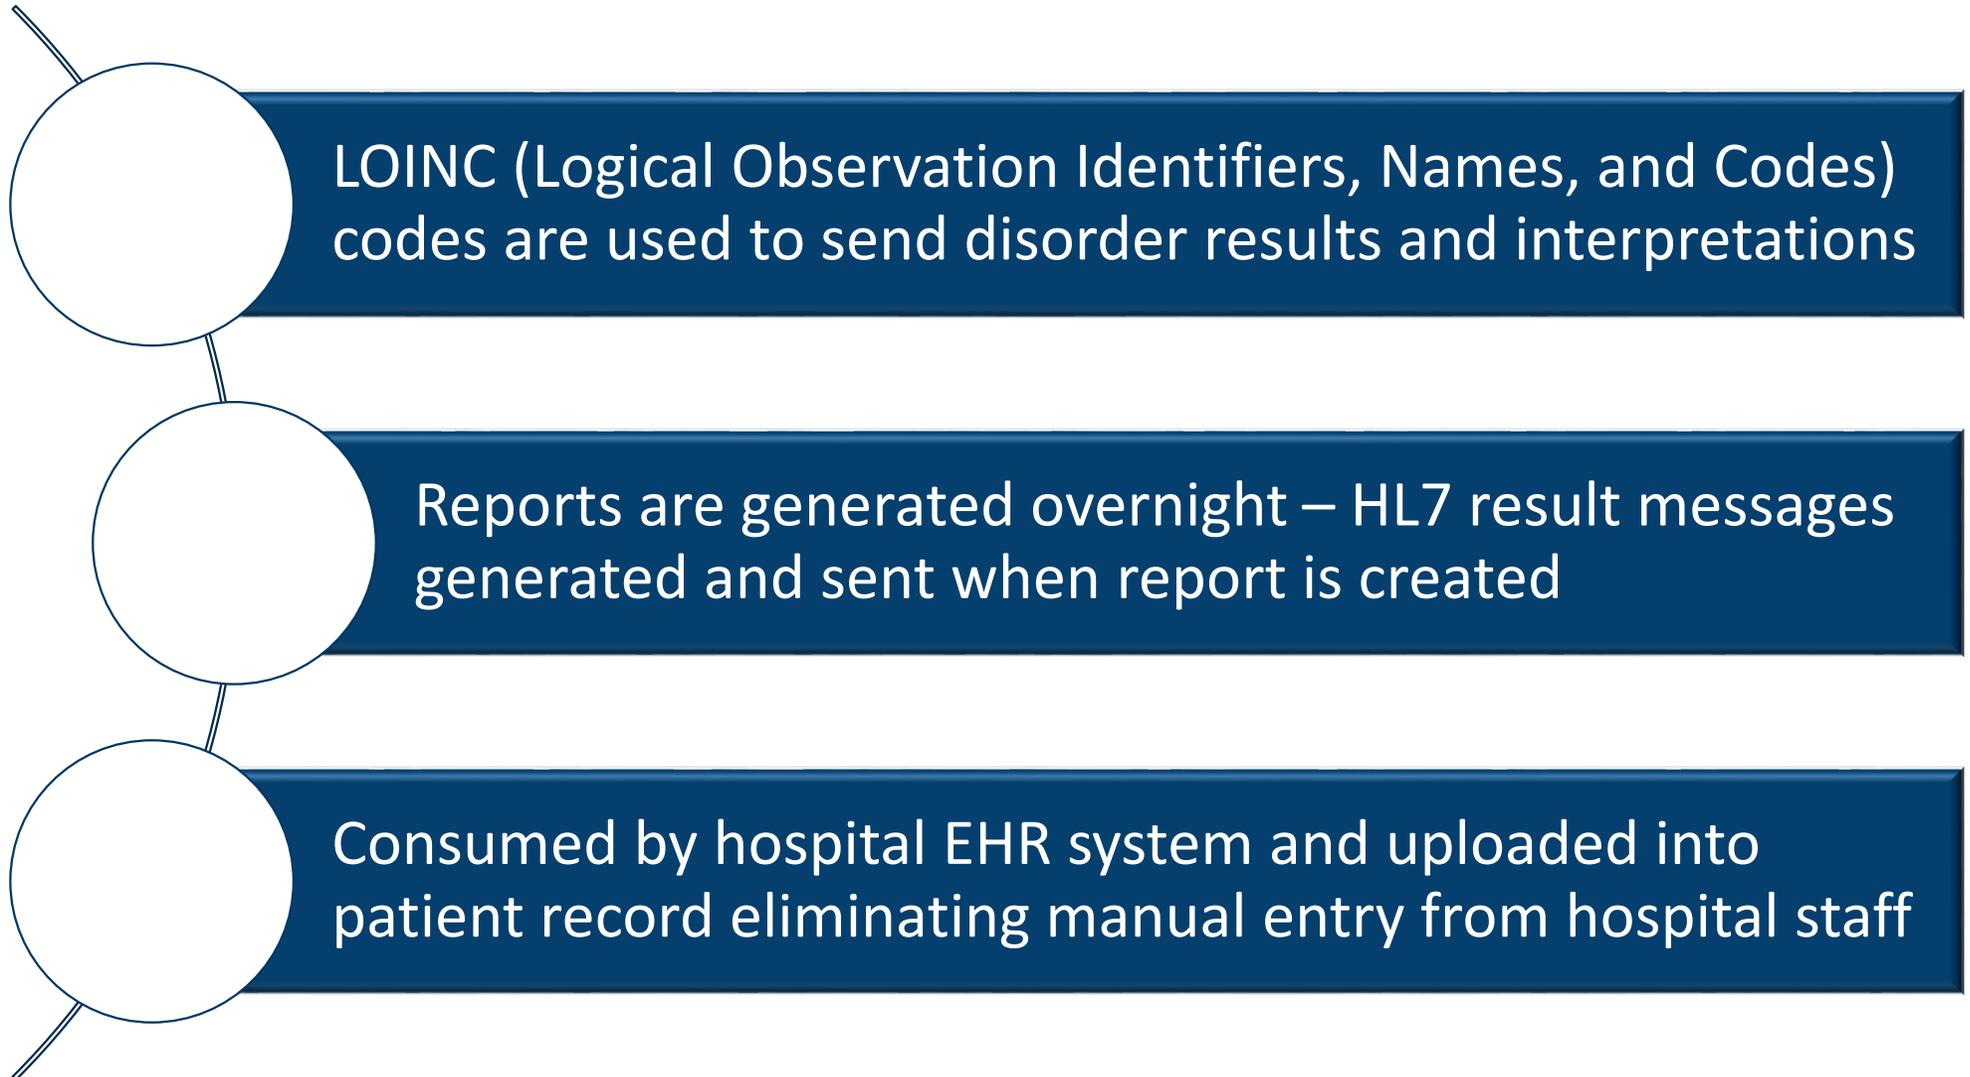

- Currently live with electronic orders and results from one pilot hospital within the CentraCare health system
- Project Team: Health System IT, hospital nursing and/or laboratory staff, MDH NBS operations, MN.IT messaging team, LIMS vendor
- Using the *HL7 Version 2.5.1*
 - *Implementation Guide: Laboratory Orders (LOI) from EHR*
 - *Implementation Guide: Laboratory Results (LRI) from EHR*
 - Implementation guides constrained down to specific information needed for MN NBS message

Electronic Laboratory Order Message

- Sending Facility Information (OID)
- Baby and Mother Demographics
- NBS Lab Order Specific Information – Ask at Order Entry (AOE) Questions:
 - Specimen Card Barcode Number
 - Date of NBS Specimen Collection
 - Time of NBS Specimen Collection
 - Infant Feeding Type
 - Has Baby Been Transfused (Yes/No)
 - Date of Transfusion
 - Primary Care Provider Name / Clinic & Phone Number
 - Infant Risk Factors that Affect NBS
 - Order Placer Number

Sending and Receiving the Result Message

NBS Result Report Example

- Information displayed on NBS report will be sent back in result message

****All data on this mock-up report is fake – generated for testing purposes only. This is not real PHI data.*

Final Newborn Screening Report

LABORATORY REPORT

SCREENING RESULTS

Disorder/Profile	Value	Result	Expected Range
Biotinidase Deficiency	BTD= 15.3 U/dL	Positive	> 55 U/dL
Congenital Adrenal Hyperplasia		Within Normal Limits	17-OHP <30 ng/mL
Congenital Hypothyroidism		Within Normal Limits	TSH < 18 µIU/mL
Cystic Fibrosis		Within Normal Limits	< 96th Percentile
Galactosemia		Within Normal Limits	GALT > 3.2 U/dL, TGAL < 12 mg/dL
Hemoglobinopathies		Within Normal Limits	Within Normal Limits = FA
Severe Combined Immunodeficiency*		Within Normal Limits	TREC Present
X-linked Adrenoleukodystrophy**		Within Normal Limits	<0.16 µmol/L C26:0-LPC
Lysosomal Disease Profile**		Within Normal Limits	Enzyme Activity Present
Spinal Muscular Atrophy*		Within Normal Limits	SMN1 Present
Amino Acid Profile		Within Normal Limits	Within Normal Limits
Acylcarnitine Profile		Within Normal Limits	Within Normal Limits

Comments

BIOTINIDASE DEFICIENCY RESULT INTERPRETATION: This newborn screen is positive for biotinidase deficiency. The biotinidase enzyme activity is reduced. Further diagnostic testing is recommended to be completed right away. Contact a metabolic specialist immediately.

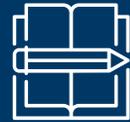

Newborn testing panel results will be sent in the electronic results message

Newborn Screening Test Results Panel – Dried Blood Spot (57794-0)

62300-9	Lysosomal Storage Disorders Newborn Screen Panel	62301-7	Lysosomal storage disorders newborn screen interpretation	Lysosomal Disease Profile
92005-8	Spinal Muscular Atrophy Newborn Screen Panel	92004-1	Spinal muscular atrophy newborn screen interpretation	Spinal Muscular Atrophy
53261-4	Amino Acid Newborn Screen Panel	46733-2	Amino acidemias newborn screen interpretation	Amino Acid Profile
58092-8	Acylcarnitine Newborn Screen Panel	58088-6	Acylcarnitine newborn screen interpretation	Acylcarnitine Profile

Benefits to Utilizing NBS Electronic Orders and Results

Eliminate manual data entry work for hospital staff across multiple steps of the NBS process

Results will automatically upload to patient record within hospital EHR system

Accelerate the NBS results process, thus providing the most efficient, accurate, and earliest care to babies born in Minnesota

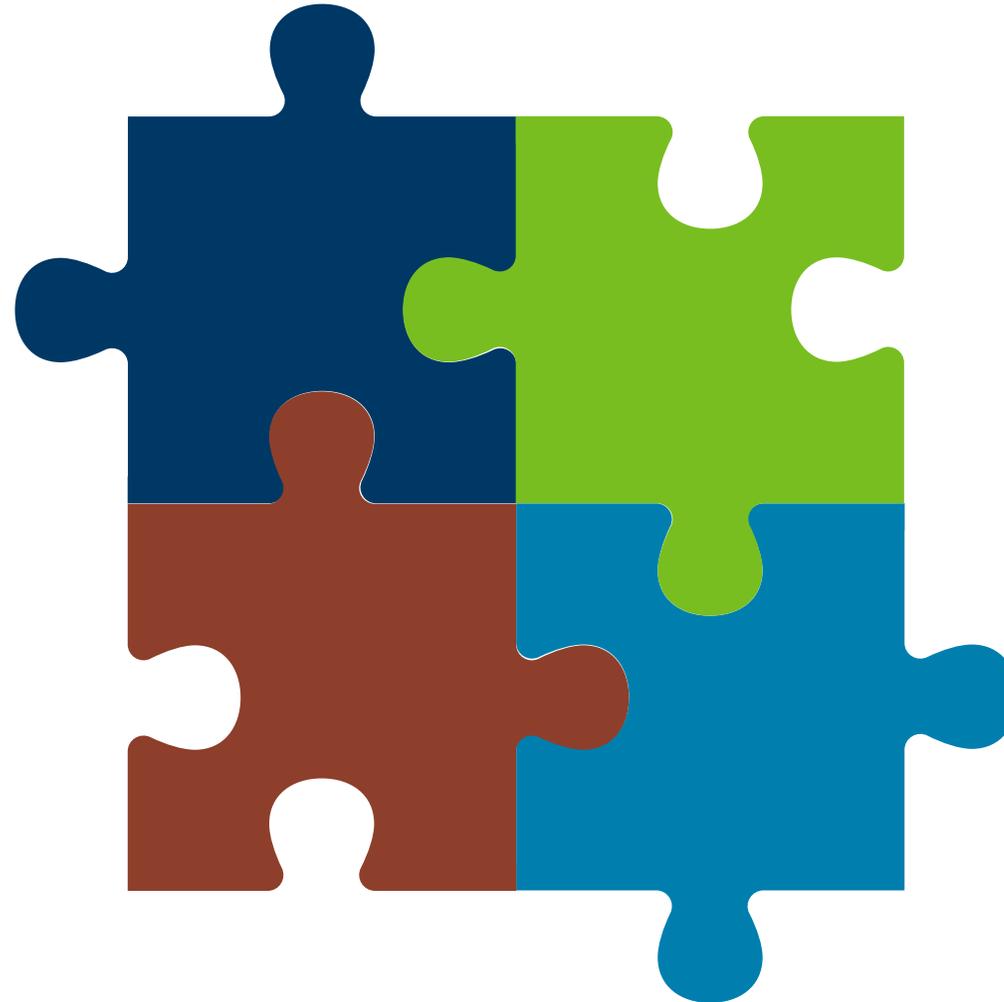

Increase the accuracy of the demographic and lab order specimen information

Lessons Learned

Identifying and involving
key hospital staff

Understanding NBS specific
verbiage for AOE questions
e.g. multi-birth, gestational
age format, etc.

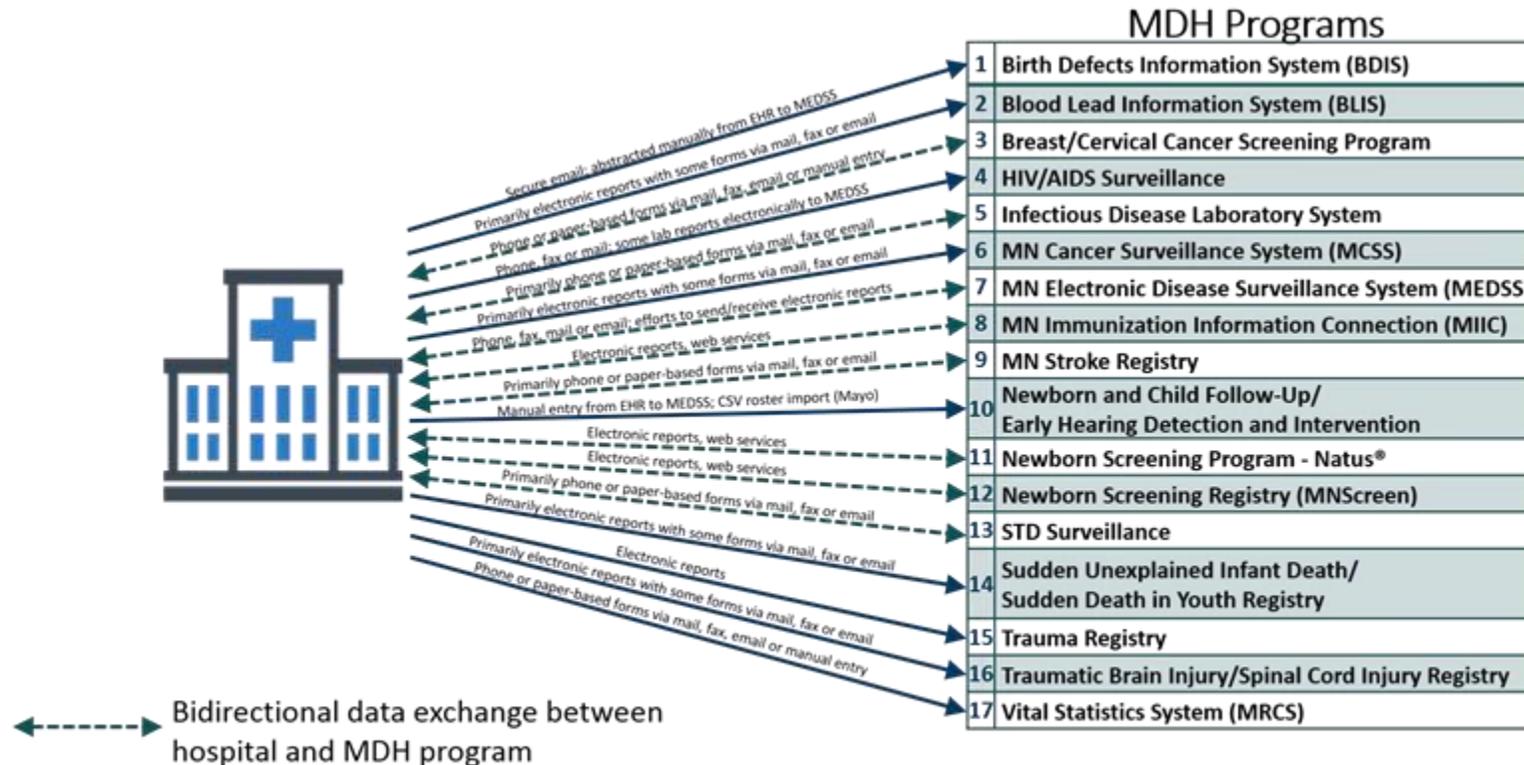

Reviewing each segment of
the HL7 message with birth
facility staff

Testing birth facility
hardware for compatibility
e.g. handheld scanners to
scan NBS card barcode

MDH Interoperability System Design Strategy

MDH Interoperability Strategy: NBS Blood Spot Electronic Orders/Results Use Case

Planned NBS Orders/Results

MDH-Koble HIO contract – how does it work?

- Connect external partners to MDH for a number of public health transactions.
- Contract pays for Koble set up fees for multiple transactions and first year of participation fee for the external partner.
- External partner provides internal IT resources to implement the projects, EHR costs, and future HIO maintenance costs (up to \$10,000 annually).
- External partner may utilize HIO for other services beyond public health reporting to maximize value of HIO maintenance costs

Next Steps

MDH Request of External Partners

Contact Newborn Screening partners at MDH

- Heather Brand heather.brand@state.mn.us
- Jill Simonetti jill.Simonetti@state.mn.us
- ✓ **Schedule meeting with DSI** to discuss more details related to health system needs
 - Determine your organizations' public health reporting priorities for implementation and share with DSI (checklist)
 - Discuss any barriers or opportunities for electronic implementation with MDH
 - [Consider Participation Agreement with Koble](https://3b54d489-fb07-4eda-b01d-8169cc695bc4.filesusr.com/ugd/64a972_dddba6a5436949e5952abe8094b9c778.pdf)
https://3b54d489-fb07-4eda-b01d-8169cc695bc4.filesusr.com/ugd/64a972_dddba6a5436949e5952abe8094b9c778.pdf
 - Plan and coordinate MDH public health reporting improvements through DSI and provide feedback to processes

Q&A

Thank you.
