## In Appreciation

The Minnesota Student Survey (MSS) Interagency Team is indebted to the students, parents, teachers, district assessment coordinators, school and district administrators, principals, and superintendents across the state that agreed to participate in and supported the MSS when it was administered in the first half of 2022. These data are made available as a result of their interest and time, and we are grateful for their efforts.

The planning and implementation of the 2022 Minnesota Student Survey administration resulted from an important collaborative effort among members of the MSS Interagency team, local educators and health professionals, researchers, and community members throughout the state of Minnesota – all of whom encouraged and supported school participation in the MSS.

Members of the MSS Interagency Team include: Lisa Burton and Maira Rosas-Lee at the Department of Education; Sharrilyn Helgertz and Bob Kuziej at the Department of Health; Phyllis Bengtson, Megan Loew, Michele Maruska and Marin Phelps at the Department of Human Services; and Valerie Clark at the Department of Corrections.

We also thank Kerri Sawyer, Dan Fernandez-Baca and Ann Kinney (retired) at Department of Health, Tricia Hummel at Department of Public Safety, Jacquelyn Freund of EpiCog, and Wilder Research for their contributions to the successful collection of 2022 MSS data.

# 2022 Minnesota Student Survey

## Survey Participation

The 2022 Minnesota Student Survey (MSS) was administered in the first half of 2022 to students in grades five, eight, nine, and eleven statewide. The survey was voluntary at all levels; districts, schools, parents, and students could all choose to opt out. Most public school districts (70%) chose to participate. Across the state, approximately 56% of fifth graders, 56% of eighth graders, 51% of ninth graders, and 41% of eleventh graders participated in the 2022 MSS. Overall participation across the four grades was approximately 51% of total enrollment.

Results from regular public schools, charter schools, and online schools are included in these tables. Results from nonpublic schools, alternative learning centers, and juvenile correctional facilities are released separately.

All schools and districts that participated in the survey followed federal laws regarding parental notification as required by the Protection of Pupil Rights Amendment (PPRA). PPRA requires that schools that participate in the survey notify parents of the survey administration, provide parents the opportunity to review the survey instrument, and allow parents to opt their child out of participating (Juvenile Correctional Facilities are exempt from this requirement).

## Mode of Administration

In 2022, all levels of the MSS were administered online. Only Juvenile Correctional Facilities could choose to administer the MSS on paper.

## Items on the Tables

The tables in this report include the responses for all survey items. Items are ordered within the tables by an overarching subject area; the order that items appear on the tables is not necessarily the order that they appeared on the survey.

The table of contents is provided on pages v-vi. The grade five survey version was shorter than the grade eight survey version, which in turn was shorter than the grade nine and eleven version. The grade five and grade eight versions did not include items appropriate only for older students. Items found on some versions of the survey but not on others are identified on the tables.

## Gender Breakdowns in Reports

This report comes in two formats: by grade and grade-and-gender. Fifth grade surveys asked “are you a boy or girl” while all other grades were asked about their sex assigned at birth (as on original birth certificate). The grade-and-gender breakdowns are available when counts for sex assigned at birth are at least 25 male and 25 female respondents in each grade level cell.

## **New Questions and Year-to-Year Comparisons**

While most MSS survey questions stayed the same as previous administrations, other questions were updated with changes to the question or response options. Some entirely new questions were added, and some questions were dropped. New questions are noted on each table. Caution must be used when making comparisons over time for any questions in which the wording has changed.

Please note that although these surveys are given repeatedly over time, the student populations change between administrations of the survey.

## **Validity of Responses**

Caution was taken to identify invalid responses and remove them from the survey results. Surveys were removed when responses were highly inconsistent, when there was a pattern of likely exaggeration, when the survey was completed outside of school hours (this did not apply to online students), or when the survey was clearly a test of the online system. In addition, surveys were removed when only the background section of the survey was answered. In total, approximately 3% of cases were removed from the 2022 survey data.

## **Online Access to MSS Data**

Data from the 2022 MSS are available on the Minnesota Department of Education's [Data Reports and Analytics, MSS Report's page](#). This web report provides access to all state, county and district-level data and provides options for filtering the data in multiple ways.

\* 5th grade survey did not ask these questions.

\*\* 8th grade survey did not ask this question.

^ An adverse childhood experience (ACE) describes a traumatic experience in a person's life occurring before age 18. The ACEs Score-short is a measure of cumulative exposure to adverse childhood conditions, and combines the responses to all but the last question in this table plus the responses to the first question about parental incarceration (See Table 17).

\* 5th grade survey did not ask this question.

\*\* Body Mass Index (BMI) is a number calculated from a child's self-reported weight and height. BMI is calculated using a standard formula. BMI-for-age percentiles are used to interpret BMI numbers for children and teens. CDC BMI-for-age growth charts were used to determine weight status according to BMI for participants in the Minnesota Student Survey.

Not overweight: Less than the 85th percentile  
 Overweight: 85th to less than the 95th percentile  
 Obese: Equal to or greater than the 95th percentile
