

STAY SAFE MN

Glencoe, MN

Community Testing Demographics

These demographics and results are for testing completed on August 20, 2020, at Glencoe City Center, Glencoe, MN. Testing was offered by the State of Minnesota in partnership with the City of Glencoe and McLeod County Public Health.

- Testing was open to everyone. Residents of neighboring communities were eligible to be tested. People who lived further away were encouraged to find a local clinic before registering.
- People with and without symptoms were tested.
- Testing was free, no insurance needed.
- Pre-registration was encouraged and could be done online and by phone.
- Testing was administered by professional medical staff.

Positivity rate: 6.43%

- 949 people were tested.
- 61 people were confirmed positive (cases).

Symptoms

59% of those who tested positive did not have symptoms at the time of testing.

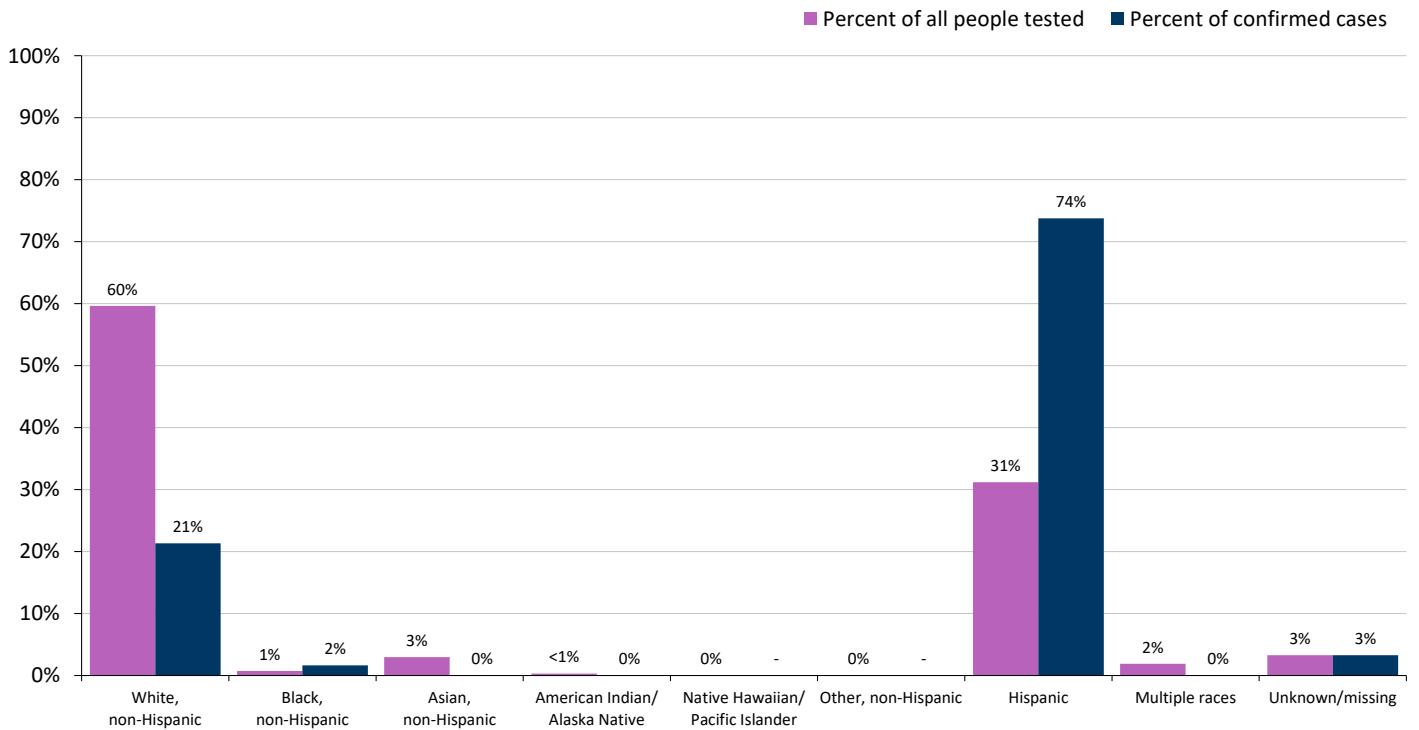

This speaks to the importance of staying home and isolating if you believe you were exposed and wearing a mask and washing your hands to reduce potential spread.

Age

Age	Age of all people tested	Age of confirmed cases
Age range	<1-89 years	5-76 years
Average age	44	43

Race/Ethnicity

People were able to select from all race/ethnicity categories that applied to them. Those listed within a race/ethnicity category only selected one race/ethnicity. If they selected more than one, they are listed under multiple races.

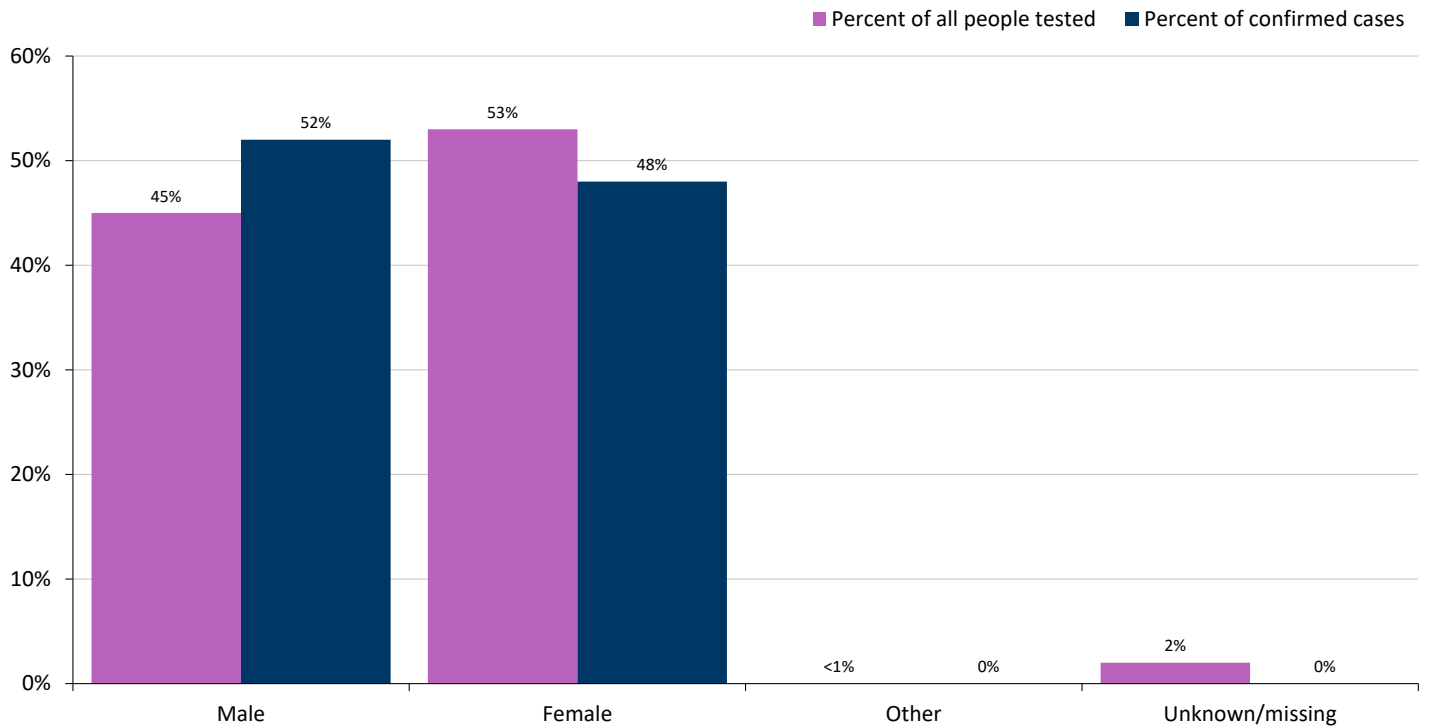

Race/Ethnicity	Number of people tested	Percent of all people tested	Number of confirmed cases	Percent of confirmed cases
White, non-Hispanic	566	60%	13	21%
Black, non-Hispanic	7	1%	1	2%
Asian, non-Hispanic	28	3%	0	0%
American Indian/Alaska Native	3	<1%	0	0%
Native Hawaiian/Pacific Islander	0	0%	-	-
Other, non-Hispanic	0	0%	-	-
Hispanic	296	31%	45	74%
Multiple races	18	2%	0	0%
Unknown/missing	31	3%	2	3%
Total	949		61	

- There were higher rates of positive cases in the Hispanic community compared to other race/ethnic groups.
 - Higher positive COVID-19 rates in this community can be attributed to systemic barriers, not individual behavior or cultural factors.

Gender

People were only able to select one gender.

Gender	Number of people tested	Percent of all people tested	Number of confirmed cases	Percent of confirmed cases
Male	431	45%	32	52%
Female	500	53%	29	48%
Other	2	<1%	0	0%
Unknown/missing	16	2%	0	0%
Total	949		61
