

# St. James Community Testing Demographics

These demographics and results are for testing completed on July 8, 2020 at St. James High School, St. James, MN.

The State of Minnesota in partnership with the City of St. James, St. James Schools, and Watonwan County Public Health, offered COVID-19 testing at Saint James High School, St. James, MN.

- Testing was open to everyone. Residents of neighboring communities were eligible to be tested. People who lived further away were encouraged to find a local clinic before registering.
- People with and without symptoms were tested.
- Testing was free, no insurance needed.
- Pre-registration was encouraged and could be done online and by phone.
- Testing was administered by professional medical staff.

## Positivity rate: 4.38%

- 571 people were tested.
- 25 people were confirmed positive (cases).

## Symptoms

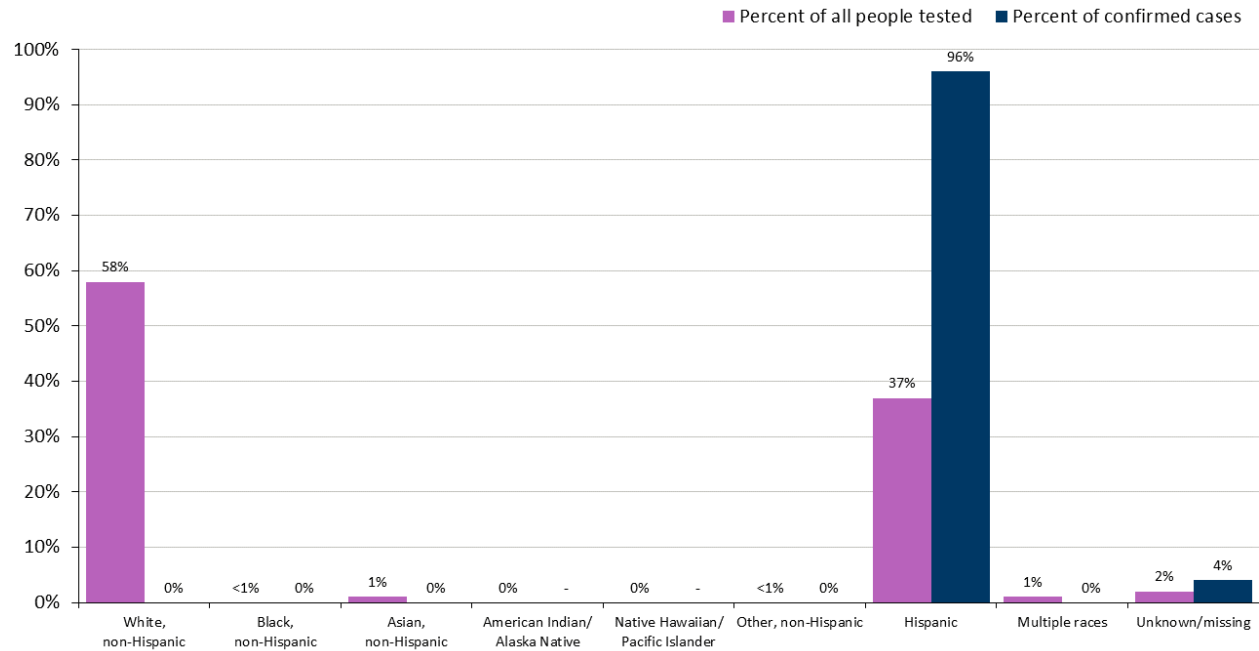

36% of those who tested positive did not have symptoms at the time of testing. This speaks to the importance of staying home and isolating if you believe you were exposed and wearing a mask and washing your hands to reduce potential spread.

## Age

Age	Age of all people tested	Age of confirmed cases
Age range	1-91 years	3-59 years
Average age	42	28

## Race/Ethnicity

Peoples were able to select from all race/ethnicity categories that applied to them. Those listed within a race/ethnicity category only selected one race/ethnicity. If they selected more than one, they are listed under multiple races.

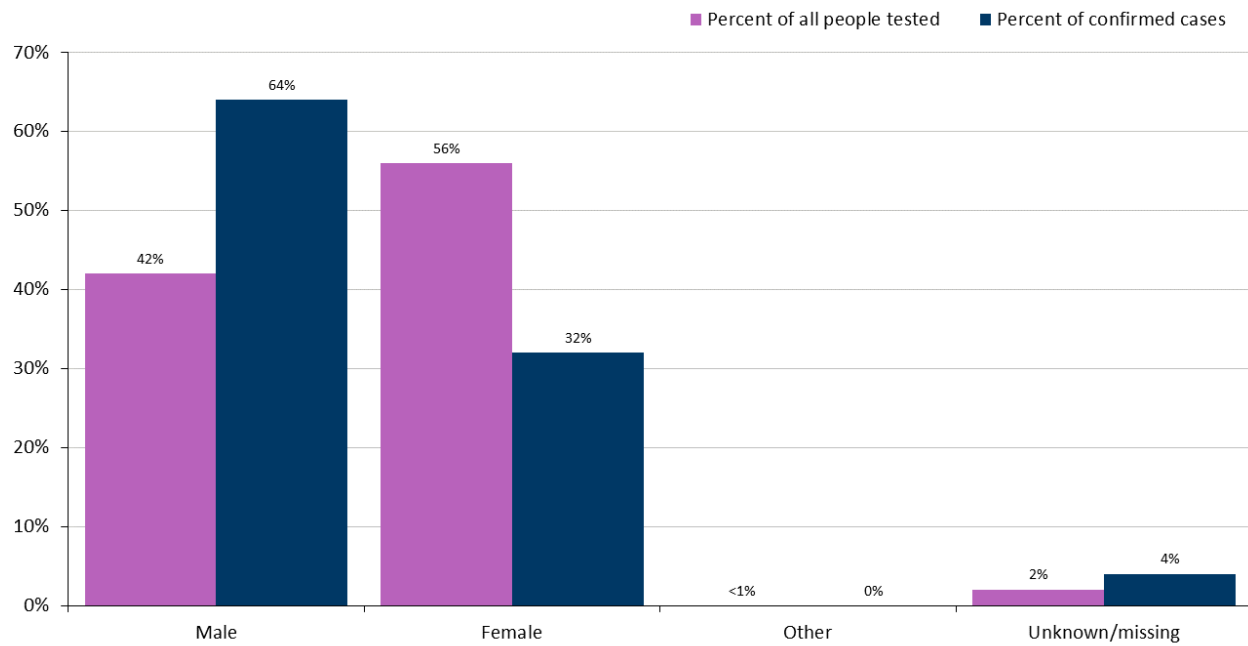

Race/Ethnicity	Number of people tested	Percent of all people tested	Number of confirmed cases	Percent of confirmed cases
White, non-Hispanic	330	58%	0	0%
Black, non-Hispanic	2	<1%	0	0%
Asian, non-Hispanic	3	1%	0	0%
American Indian/Alaska Native	0	0%	-	-
Native Hawaiian/Pacific Islander	0	0%	-	-
Other, non-Hispanic	2	<1%	0	0%
Hispanic	214	37%	24	96%
Multiple races	7	1%	0	0%
Unknown/missing	13	2%	1	4%
<b>Total</b>	<b>571</b>		<b>25</b>	

- There were higher rates of positive cases in the Hispanic community compared to other race/ethnic groups.
  - Higher positive COVID-19 rates in this community can be attributed to systemic barriers, not individual behavior or cultural factors.

## Gender

People were only able to select one gender.

Gender	Number of people tested	Percent of all people tested	Number of confirmed	Percent of confirmed cases
Male	240	42%	16	64%
Female	318	56%	8	32%
Other	1	<1%	0	0%
Unknown/missing	12	2%	1	4%
<b>Total</b>	<b>571</b>		<b>25</b>
