

Ever heard of the big, bad

# Blacklegged Tick?

You know, the “deer” tick

Spending time in the woods? You should know a few things about ticks...

My, what big mouthparts you have! These help them hold on for days while feeding.

Super sneaky, they're so small that they may just look like a freckle on your skin.

No wings = No air time!  
You won't see these guys flying or falling from trees.
