

FHV CQI Learning Collaborative 2017 – Data Measures

SMART AIM: By September 30, 2017, we will improve child development through developmental, social emotional and/or caregiver depression screening so that 95% or more of those with a positive screen or concern are referred, and 95% or more of those referred receive further evaluation.

DEVELOPMENTAL SCREENING & REFERRAL

Measure #1: % of children with a positive screen of concern referred to services

Measure #2: N of children referred who received further evaluation

CHILD DEVELOPMENT

Measure #1: % of children with a positive social-emotional screen or concern referred to services

Measure #2: N of children referred who received further evaluation

MATERNAL DEPRESSION

Measure #1: % caregivers with a positive depression screen referred to services

Measure #2: N of caregivers referred who received further care
