

MN WIC Medical Formula Amounts Guide

FEBRUARY 2023

The Minnesota WIC Formula Amounts Guide contains a list of Minnesota WIC approved medical formulas that are in the WIC Information System. The product list provides the following information to assist local agencies when ordering formula: packaging, maximum allowed by WIC category, and reconstituted ounces per container.

Packaging of formula is listed in the first column. Reconstituted ounces per container are listed in the last column.

Packaging of formula varies at stores and may be different if ordered from the state office. For example, some products listed below are in 6-packs but may also be available at stores in 8, 12, or 15 packs. If WIC *benefit descriptions* are for a 6-pack, then the participant must purchase the 6-pack size at the store. CPAs need to issue the formula according to how the information system lists the formula. If the information system lists the product as 6 packs, and 24 individual cans are sent to the agency, CPAs will need to divide the amount by 6 to issue benefits.

Maximum monthly allowances for each WIC category are listed in the middle columns.

- Mostly Breastfed (MBF), Some-Breastfed (SBF), Fully Formula Fed (FFF)

Alfamino Infant (14.1 oz. pwd) - Nestle
