

# Health Care Homes Recertification

## QUALITY REPORT TEMPLATE

For **Foundational Level recertification**, the HCH selects at least one quality indicator from each of the Triple Aim categories of improving patient/population health, patient experience, and cost of care demonstrating they have measured, analyzed, and tracked these indicators during the previous year. This may include quality measures that are submitted to the Statewide Quality Reporting System or may be based on other quality needs. To meet the Performance Reporting and Quality Improvement standard, the HCH will be asked to provide an overview of the HCH’s quality improvement work during the team meeting. HCHs seeking recertification may opt to submit their quality report in any format prior to the team meeting.

For **Level 2 certification**, the HCH will select at least one quality indicator from each of the Triple Aim categories and address one or more identified health disparities within the population served by the HCH.

The following is an example template of how the organization might present their quality report. PDSA (Plan, Do, Study, Act) planning cycles, along with other structured quality improvement methods, also work well to meet this standard.

**Organization Name:** \_\_\_\_\_

Quality Report	Project Aim	Goal/Expected Outcome	Changes made, strategies used, implementation	Results/Outcomes
Improvement in patient/population health				
Quality of patient experience				

HCH RECERTIFICATION QUALITY REPORT TEMPLATE

Quality Report	Project Aim	Goal/Expected Outcome	Changes made, strategies used, implementation	Results/Outcomes
Measures related to cost effectiveness of services				
Level 2 HCH certification requirement: Addresses health disparities within the population served by the organization.
