- vi. The grantee must maintain support documentation of the purchasing or bidding process utilized to contract services in their financial records, including support documentation justifying a single/sole source bid, if

applicable.

- vii. Notwithstanding (i) - (iv) above, State may waive bidding process requirements when:
 - Vendors included in response to competitive grant request for proposal process were approved and incorporated as an approved work plan for the grant or
 - There is only one legitimate or practical source for such materials or services and that grantee has established a fair and reasonable price.
- viii. Projects that include construction work of \$25,000 or more, are subject to applicable prevailing wage laws, including those under Minnesota Statutes 177.41 through 177.44.
- ix. Grantee must not contract with vendors who are suspended or debarred in Minnesota: The list of debarred vendors is available at:
<https://mn.gov/admin/osp/government/suspended-debarred/>.

Conflicts of Interest

MDH will take steps to prevent individual and organizational conflicts of interest, both in reference to applicants and reviewers per [Minn. Stat. § 16B.98](#) and the Office of Grants Management’s Policy 08-01, “Conflict of Interest Policy for State Grant-Making.”

Applicants must complete the Applicant Conflict of Disclosure form and submit it as part of the completed application. Failure to complete and submit this form will result in disqualification from the review process.

Organizational conflicts of interest occur when:

- a grantee or applicant is unable or potentially unable to render impartial assistance or advice
- a grantee’s or applicant’s objectivity in performing the grant work is or might be otherwise impaired
- a grantee or applicant has an unfair competitive advantage

Individual conflicts of interest occur when:

- an applicant, or any of its employees, uses their position to obtain special advantage, benefit, or access to MDH’s time, services, facilities, equipment, supplies, prestige, or influence
- An applicant, or any of its employees, receives or accepts money, or anything else of value, from another state grantee or grant applicant with respect to the specific project covered by this RFP/project.
- An applicant, or any of its employees, has equity or a financial interest in, or partial or whole ownership of, a competing grant applicant organization.
- An applicant, or any of its employees, is an employee of MDH or is a relative of an employee of MDH.

In cases where a conflict of interest is perceived, disclosed, or discovered, the applicants or grantees will be notified and actions may be pursued, including but not limited to disqualification from eligibility for the grant award or termination of the grant agreement.

Public Data and Trade Secret Materials

All applications submitted in response to this RFP will become property of the State. In accordance with [Minn. Stat. § 13.599](#), all applications and their contents are private or nonpublic until the applications are opened.

Once the applications are opened, the name and address of each applicant and the amount requested is public. All other data in an application is private or nonpublic data until completion of the evaluation process, which is defined by statute as when MDH has completed negotiating the grant agreement with the selected applicant.

After MDH has completed the evaluation process, all remaining data in the applications is public with the exception of trade secret data as defined and classified in [Minn. Stat. § 13.37](#), subd. 1(b). A statement by an applicant that the application is copyrighted or otherwise protected does not prevent public access to the application or its contents. ([Minn. Stat. § 13.599](#), subd. 3(a)).

If an applicant submits any information in an application that it believes to be trade secret information, as defined by [Minn. Stat. § 13.37](#), the applicant must:

- Clearly mark all trade secret materials in its application at the time it is submitted,
- Include a statement attached to its application justifying the trade secret designation for each item, and
- Defend any action seeking release of the materials it believes to be trade secret, and indemnify and hold harmless MDH and the State of Minnesota, its agents and employees, from any judgments or damages awarded against the State in favor of the party requesting the materials, and any and all costs connected with that defense.
- This indemnification survives MDH's award of a grant agreement. In submitting an application in response to this RFP, the applicant agrees that this indemnification survives as long as the trade secret materials are in possession of MDH. The State will not consider the prices submitted by the responder to be proprietary or trade secret materials.

MDH reserves the right to reject a claim that any particular information in an application is trade secret information if it determines the applicant has not met the burden of establishing that the information constitutes a trade secret. MDH will not consider the budgets submitted by applicants to be proprietary or trade secret materials. Use of generic trade secret language encompassing substantial portions of the application or simple assertions of trade secret without substantial explanation of the basis for that designation will be insufficient to warrant a trade secret designation.

If a grant is awarded to an applicant, MDH may use or disclose the trade secret data to the extent provided by law. Any decision by the State to disclose information determined to be trade secret information will be made consistent with the Minnesota Government Data Practices Act ([Ch. 13 MN Statutes](#)) and other relevant laws and regulations.

If certain information is found to constitute trade secret information, the remainder of the application will become public; in the event a data request is received for application information, only the trade secret data will be removed and remain nonpublic.

Audits

Per [Minn. Stat. § 16B.98](#), subd. 8, the grantee's books, records, documents, and accounting procedures and practices of the grantee or other party that are relevant to the grant or transaction are subject to examination by the granting agency and either the legislative auditor or the state auditor, as appropriate. This requirement will last for a minimum of six years from the grant agreement end date, receipt, and approval of all final reports, or the required period of time to satisfy all state and program retention requirements, whichever is later.

Affirmative Action and Non-Discrimination Requirements for all Grantees

The grantee agrees not to discriminate against any employee or applicant for employment because of race, color, creed, religion, national origin, sex, marital status, status in regard to public assistance, membership or activity in a local commission, disability, sexual orientation, or age in regard to any position for which the employee or applicant for employment is qualified. [Minn. Stat. § 363A.02](#). The grantee agrees to take affirmative steps to employ, advance in employment, upgrade, train, and recruit minority persons, women, and persons with disabilities.

The grantee must not discriminate against any employee or applicant for employment because of physical or mental disability in regard to any position for which the employee or applicant for employment is qualified. The grantee agrees to take affirmative action to employ, advance in employment, and otherwise treat qualified disabled persons without discrimination based upon their physical or mental disability in all employment practices such as the following: employment, upgrading, demotion or transfer, recruitment, advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship. Minn. Rules, part [5000.3550](#).

The grantee agrees to comply with the rules and relevant orders of the Minnesota Department of Human Rights issued pursuant to the Minnesota Human Rights Act.

Non-Transferability

Grant funds are not transferrable to any other entity. Applicants that are aware of any upcoming mergers, acquisitions, or any other changes in their organization or legal standing, must disclose this information to MDH in their application, or as soon as they are aware of it.

2.4 Review and Selection Process

Review Process

Funding will be allocated through a competitive process with review by a committee representing a broad range of health professionals with experience in grant writing and review

and the American Indian culture. The review committee will evaluate all eligible and complete applications received by the deadline.

MDH will review all committee recommendations and is responsible for award decisions. **The award decisions of MDH are final and not subject to appeal.** Additionally:

- MDH reserves the right to withhold the distribution of funds in cases where proposals submitted do not meet the necessary criteria.
- The RFP does not obligate MDH to award a grant agreement or complete the project, and MDH reserves the right to cancel this RFP if it is considered to be in its best interest.
- MDH reserves the right to waive minor irregularities or request additional information to further clarify or validate information submitted in the application, provided the application, as submitted, substantially complies with the requirements of this RFP. There is, however, no guarantee MDH will look for information or clarification outside of the submitted written application. Therefore, it is important that all applicants ensure that all sections of their application are complete to avoid the possibility of failing an evaluation phase or having their score reduced for lack of information.

Selection Criteria and Weight

The review committee will be reviewing each applicant on a 100-point scale with 5 additional bonus points available. A standardized scoring system will be used to determine the extent to which the applicant meets the selection criteria.

The scoring factors and weight that applications will be judged are based on criteria detailed in [Attachment A: Application Evaluation Criteria](#).

Grantee Past Performance and Due Diligence Review Process

- It is the policy of the State of Minnesota to consider a grant applicant's past performance before awarding subsequent grants to them.
- State policy requires states to conduct a pre-award risk assessment prior to a grant award. Additional information may be required for proposed budgets of \$50,000 and higher to a potential applicant in order to comply with [Policy on Pre-Award Risk Assessment for Potential Grantees](#).

Notification

MDH anticipates notifying all applicants via email of funding decisions by November 12, 2024.

Budget Narrative

- Provide a detailed justification of the estimated project expenses to successfully meet the goals of the proposed project. The budget explanation should be broken down by each budget category. Provide information for each line item of expense so that it is clear how the final cost was determined and why it is needed for the project. The narrative should provide information on the need for specific expenditures and how they will address the problem statement.

Budget Categories

- **Salaries:** Salaries should include the costs of personnel who work directly for the applicant and are paid a salary or wage directly from the applicant organization. This should not include administrative staff included in the indirect rate. Salaries can be calculated and described in the Budget Narrative as an hourly wage with total hours estimated to be spent on the project, or an annual salary with the estimated percentage of the total FTE.
- **Fringe:** This category includes share of pay roll tax, health insurance costs, Medicare/Medicaid, etc. for employees billed to this grant under the "salaries" category. If the applicant has expenses in this category, they should explain how they were calculated in the Budget Narrative. This is often calculated at a percentage of salary. Example, \$50,000 x .25% fringe = \$12,500
- **Travel:** This category includes travel expenses necessary to complete the grant project.
- **Supplies:** This category includes supplies needed specifically for the grant project. It cannot include existing program expenses. Supplies include equipment that is less than \$5,000.
- **Contracted:** This category includes expenses for individuals or organizations the applicant contracts with to complete the project, including facilitators and trainers.

- **Equipment/Capital:** This category includes funding used to purchase equipment or to make capital improvements necessary to complete the grant project. Equipment has a value of \$5,000 or over. Items below \$5,000 are considered supplies.
- **Other expenses:** Use the “other” categories to enter expenses that do not fit in the rest of the budget categories, for example stipends intended for community members attending planning meetings.
- **Indirect:** An indirect cost rate is a percentage used to distribute indirect costs to all of an organization’s programs that benefit from them. Grantees cannot claim indirect costs in excess of the indirect cost rate that applies to their organization. Grantees must submit and retain on-file, the corresponding documentation of that indirect cost rate as outlined below:
 - Grantees with a federally negotiated indirect cost rate can use grant funds for indirect costs in an amount up to but not exceeding that rate. Grantees must submit proof of the federally negotiated indirect cost rate as an attachment to this application. Grantees are responsible for ensuring that the rate is not applied to direct costs that are excluded from the indirect rate.
 - Grantees without a federally negotiated indirect cost rate can use grant funds for indirect costs in an amount up to but not exceeding 10% of total direct costs.
