

Adding Immunizations to Your MIIC Record

If your Minnesota Immunization Information Connection (MIIC) record is missing immunizations that you received and you have the information, you can submit a [MIIC Public Inquiry Form \(https://redcap.health.state.mn.us/redcap/surveys/?s=Y3JCL3NDE7FPEXAM\)](https://redcap.health.state.mn.us/redcap/surveys/?s=Y3JCL3NDE7FPEXAM) request to the Minnesota Department of Health (MDH) with acceptable proof of vaccination.

Acceptable proof of vaccination

- An official paper or electronic document from the organization who gave the vaccine. This can include documentation from a clinical application such as MyChart or similar, handwritten records from organizations who do not print typed records, or Centers for Disease Control and Prevention (CDC) COVID-19 vaccination card.
- A person's U.S. Department of State's Vaccination Documentation form DS-3025 that includes a person's verified past immunizations.
- An official International Certificate of Vaccination or Prophylaxis (yellow card).

The document should include vaccination date (month, day, and year); vaccine type or product; and the individual's name and date of birth. Proof of vaccination should be sent at least seven days after the last vaccination date on the record to allow time for providers to submit the data to MIIC.

Note: If you choose to send it by email, we recommend sending it by an encrypted email to protect your private health information.

If you received immunization in another state, you can find contact information for that state's Immunization Information System (IIS) at [CDC: Contacts for IIS Immunization Records \(www.cdc.gov/vaccines/programs/iis/contacts-locate-records.html\)](http://www.cdc.gov/vaccines/programs/iis/contacts-locate-records.html).
