

2013-14 Annual Immunization Status Report (AISR) Summary

2013-14 School Immunization Percentages

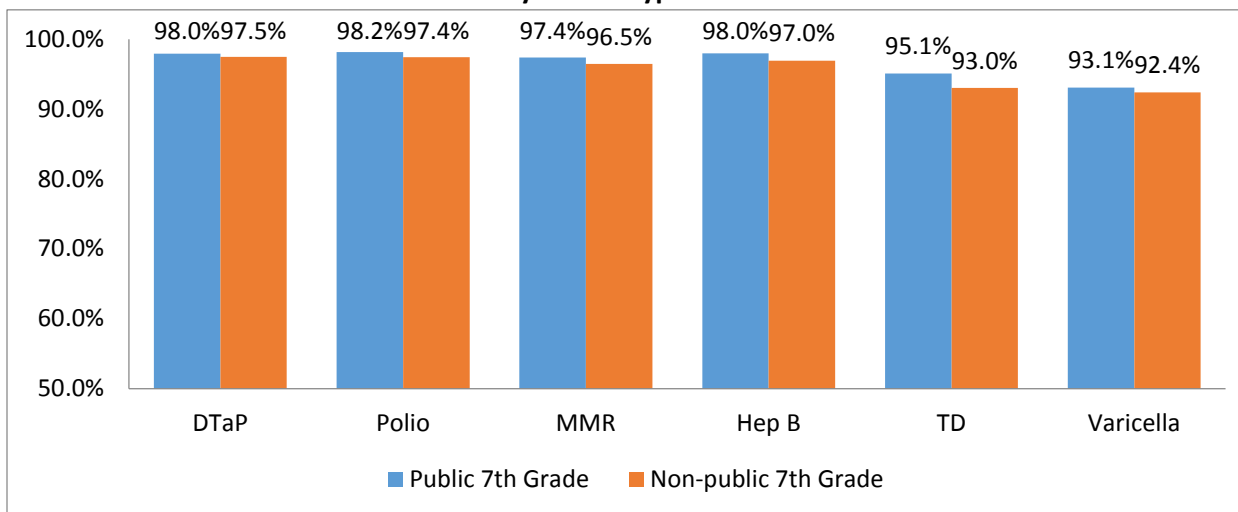

For the 2013-14 school year, 856 of 889 (96.3 percent) public schools with Kindergarten enrollment and 563 of 672 (83.8 percent) public schools with seventh grade enrollment completed the AISR and reported the data to MDH. Private schools report immunization data to MDH as well, but the response rate cannot be calculated because the total number of private schools in Minnesota with Kindergarten enrollment is unknown.

Vaccination Percentages Kindergarten and Seventh Grade

Percent of Kindergarteners Vaccinated* by School Type

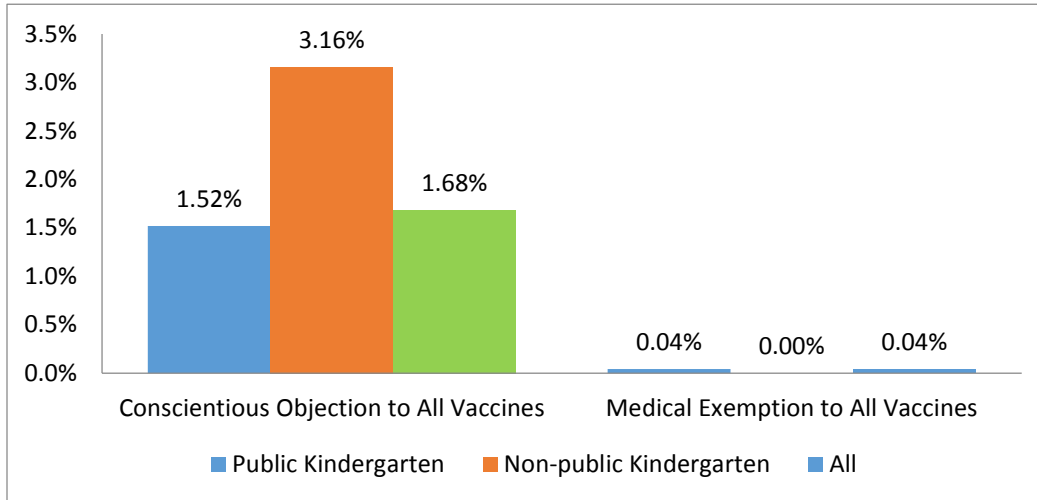

Percent of Seventh Graders Vaccinated* by School Type

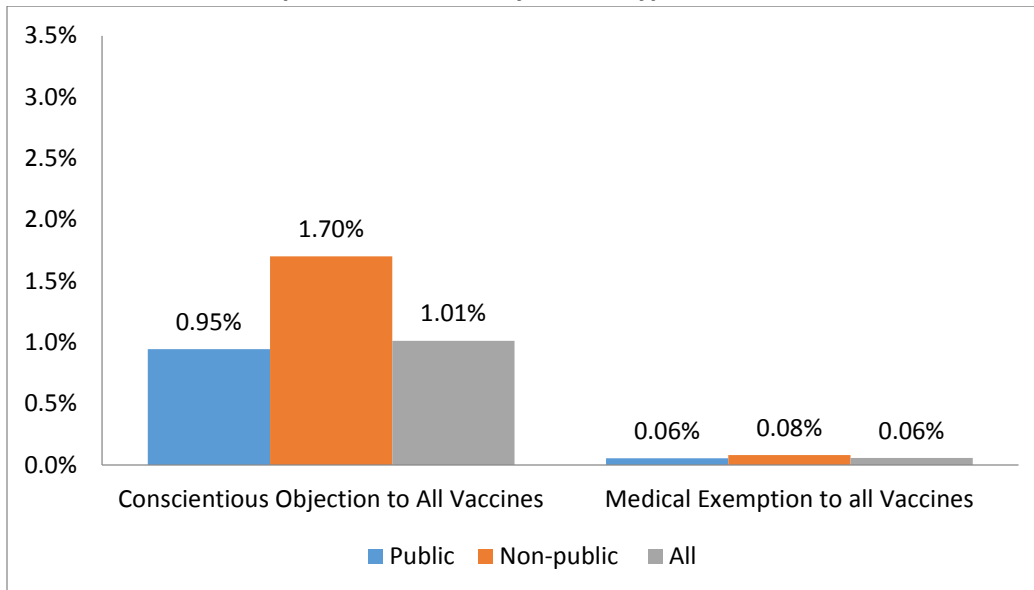

*Percent vaccinated includes students who are either up-to-date or are in the process of completing vaccination (partially vaccinated). As a result, "percent vaccinated" may include students who are fully protected against disease.

Legal Exemptions for Kindergarten and Seventh Grade

Kindergarteners Exempt to All Vaccines by School Type

Seventh Graders Exempt to All Vaccines by School Type

AISR (Up-to-date) Vaccine Coverage Definitions

Age/Grade	DTaP/ DT/Td doses	Polio doses	MMR doses	Hepatitis B doses	Varicella doses	Tdap doses
6 years/Kindergarten	5 ^a	4 ^b	2	3	2 or disease history	No requirement
Grade seven	3 ^c	3 ^c	2	2-3 ^d	2 or disease history	1

^a The 5th dose of DTP/DTaP is not required if the previous dose was given after the fourth birthday

^b Fourth dose of polio vaccine is not required if the previous dose was given after the fourth birthday

^c Three doses is the minimum necessary for children 7 years of age or older, regardless of the age when the initial series was given

^d A two-dose hepatitis B adolescent schedule given between the ages of 11 through 15 years is acceptable
